### Reyes Math 8 or Math 1 Extra Credit Project (Test Grade)

**Directions:** This project is only designed for students who want to improve their grade. Please cut out all the triangles on the page. Notice that the sides of the triangles either have a problem or answer. Match the problem with the answer. Paste the picture that it creates on construction paper. Please be sure that your first and last name is on the paper and that the picture is neatly arranged on the construction paper. Show your work for each problem on a separate piece of paper in an orderly fashion. I will not grade the project if you do not show all work and it is not neat. In order to get the 100% for test grade the answers must be 100% correct. No partial credit is given. I can look at your project as many times as you need me to during our tutoring sessions and study halls **before October 25, 2014.**
